

## How to get started with the NDI DSS Sandbox

---

- 1) Getting the client-id and secret. Go to <https://demo.sandbox.ndi.gov.sg/> and go to the page with "Register Client App"
  - Use a Hotmail or an outlook email address for the OTP. Do check your junk folder for the OTP.
  - App Name will be the Name to be displayed on the SingPass Mobile
  - You will need to have a domain with https-enabled
  - Redirect URI is not used in the QR flow
  - Check "I would like to register as a Digital Signing Partner"
  - For Client Notification Endpoint Base Path, it is used to send the user certificate back to you.
  - JWKS URI can be left blank.
- 2) Take a screenshot/copy down the generated details, in particular the Client Id and Client Secret.
- 3) Download the SingPass Mobile Sandbox APK from this link:  
[https://install.appcenter.ms/users/devconf2018/apps/ndi-demo-app/distribution\\_groups/all-users-of-ndi-demo-app](https://install.appcenter.ms/users/devconf2018/apps/ndi-demo-app/distribution_groups/all-users-of-ndi-demo-app)
  - Note that it is only available in Android, version 6 onwards.
  - Registration please use a Hotmail or an outlook as well
